

## **Comprehensive Training Video Available For VELscope® Customers**

### ***Video Designed to Maximize Utility of Innovative Oral Cancer Screening System***

VANCOUVER, British Columbia—June 11, 2007—LED Dental Inc. announced today that it has recently produced a new 4-module training video on DVD that will be made available free of charge to all users of its VELscope Oral Cancer Screening System.

The DVD's four modules cover: the proper 10-step oral cancer examination procedure, including examination by conventional incandescent light; VELscope assembly and accessories; the VELscope screening procedure; and a VELscope clinical use guide. As a special bonus, the DVD also includes a PowerPoint® presentation providing additional useful information about oral cancer and VELscope.

According to Wayne Rees, president of LED Dental, "VELscope users will especially appreciate the clinical use guide, as it contains numerous photos of actual cases along with their post-biopsy diagnoses." In addition to being made available to existing VELscope users, the DVDs will ship with all new systems. "We are very pleased to support our valued customers by providing this insightful video," said Rees, "which we feel will enhance their ability to care for the health of their patients through early detection of cancerous and pre-cancerous tissues."

VELscope customers may order their free DVD at <http://www.velscope.com/velscope/registration.php>.

#### **About LED Dental**
