  - *Training materials for the dentist and staff.*
- **2 free CE credits and discounts on additional training**

### **VELscope: The Only System with the Following FDA and Health Canada Clearances:**

"VELscope is intended to be used by a dentist or health-care provider as an adjunct to traditional oral examination by incandescent light to enhance the visualization of oral mucosal abnormalities that may not be apparent or visible to the naked eye, such as oral cancer or pre-malignant dysplasia."

"VELscope is further intended to be used by a surgeon to help identify diseased tissue around a clinically apparent lesion and thus aid in determining the appropriate margin for surgical excision."

**Get it early. Get it all.™**
